N°	Title of the theme	Topics
1	Concrete roads and the green deal	Co <sub>2</sub> reduction - LCA - new binders - albedo - fuel consumption - energy - air and water quality
2	Concrete roads and the circular economy	Circular concepts - recycling - cradle to cradle
3	Concrete roads and economic aspects	LCCA - tendering procedures - price stability - competition
4	Concrete roads and society	Driving comfort - noise - safety - skid resistance - safety barriers
5	Innovative concepts for concrete roads	Big data - BIM - ITS - sensors - energy harvesting roads - electric roads
6	Materials and pavement design	Materials, cement/concrete for various paving applications, concrete road materials for a minimum carbon footprint
7	Highways	Motorways - expressways - CRCP and JPCP - overlays
8	High axle-load areas	Truck parking area - airport pavements - industrial pavements
9	Urban applications	Urban roads and streets - intersections and roundabouts - pedestrian pavements - cycling paths - decorative concrete
10	Maintenance and preservation strategies and techniques	Preservation - repair - maintenance - surfacetreatments - structural capacity assessment and instrumentation - surface characteristics
11	Case studies	General reports on project applications

### Special sessions

1	Baselayers	Hydraulically bound base layers - soil stabilization - in-situ pavement recycling
2	Concrete block paving	Concrete paving blocks - tiles - slabs - removable pavements
