

Concrete Roads 2023

Krakow

Concrete road experts from all over the world expected in Krakow!

Poland is hosting the 14th edition of the international event devoted to concrete roads, which brings together the best experts in this field from around the world. The event takes place every four years, and previous editions were held, among others, in Berlin, Prague, Seville, Brussels and Istanbul.

June 25-28, 2023,
Doubletree by Hilton, Krakow

“Concrete Roads to a Green World”

The motto is reflected in the event’s agenda, which – in addition to customary technical topics – places strong emphasis on sustainability matters.

Over 100 submissions from all over the world

Including innovative topics such as big data, BIM, ITS, sensors and energy from the road – smart roads, or more traditional issues of construction and maintenance of various concrete pavements.

500 participants

We expect to see around 500 participants in Krakow. Online participation is also an option.

3 technical trips

Highway, tunnels with concrete pavements on the expressway, local roads and bicycle paths.
