

## EUPAVE Newsletter - July 2017

### EUPAVE event "Road infrastructure for connected, autonomous and electric vehicles"

On Wednesday, 28 June EUPAVE and MEP Isabella De Monte held a breakfast debate on "Road infrastructure for connected, autonomous and electric vehicles" in the European Parliament. Around 40 attendees included several MEPs and representatives of the European Commission.

### 131 abstracts for the 13th International Symposium on Concrete Roads

The German "InformationsZentrum Beton", together with EUPAVE and their partners are pleased to announce the receipt of no less than 131 abstracts for the 13th International Symposium on Concrete Roads.

The International Technical Programme Committee reviewed the abstracts coming from 24 countries and split them into the different themes.

In total around 90 papers will be presented orally during the academic sessions. The others will be invited to the poster session.

Upon receipt of the acceptance letter and the paper guidelines to follow, authors will have until the **27 October 2017** to submit their papers including the remarks given by the Committee.

### \* Information for sponsors and exhibitors available \*

If you wish to present your company and your services - as exhibitor or sponsor - in Berlin to an expert public and establish valuable contacts for your company's future, find

all the information concerning the registration for exhibitors and sponsors on the [Symposium website](#).

## EUPAVE releases new leaflet, "Concrete Safety Barriers: a lifetime of safety"

Concrete safety barriers offer a sustainable solution for road safety. They are available in a wide range of products, from temporary workforce protection in a work zone, to the highest containment levels for heavy goods vehicles. They are competitive with other barrier systems based on initial construction costs and, thanks to their 50-year life, concrete barriers are unbeatable on life-cycle cost.

Click [here](#) to access the full leaflet.

## BBS Barriers new brochure on Security Barrier

Britpave Barrier Systems Ltd releases a new brochure on Security Barrier. The document is an overview of BBS's BsecB Security Barrier explaining the key benefits, their carefully selected partners, PAS68 testing, the applications, the construction methods, the auxiliary options, the aesthetic design variations, the quality control and sustainability.
