

PARTNERSHIP INFORMATION

January 2022

EUPAVE is a non-for-profit association founded in 2007 with the objective to study and promote all aspects of cement and concrete contributions to transport infrastructure and paving in general, with particular focus on the specific contributions of concrete products to road safety, fuel consumption, congestion relief and sustainability, amongst others.

Our mission is to advocate and enable wider use of cement and concrete applications in European transport infrastructure by engaging with EU, national and local decision makers, by disseminating technical know-how and communicating benefits and by promoting innovation and best practices in the sector.

In order to strengthen communication with the industry, EUPAVE created a category of involvement specially designed for contractors, designers, road construction engineers, research institutes and academia: **"PARTNER"**.

For a fee of 1 000 EUR per year, Partners contribute and support EUPAVE efforts to develop use of cement and concrete as a sustainable solution for pavement and infrastructure.

Further EUPAVE Partners will directly benefit from their involvement in EUPAVE through:

- Exchange of know-how and best practice between industry stakeholders
- Participation in EUPAVE Best Practices and Environmental Strategy Working Groups
- Participation in site visits and other EUPAVE events (free or paying depending on event)
- €100 reduction for 1 person for International Symposium on Concrete Roads registration fee
- Announcement of partnership on EUPAVE website and in EUPAVE newsletter
- Free hard copies (3 of each) and soft copies of EUPAVE publications.
- Free access to proceedings of the previous International Symposia on Concrete Roads
